

USER manual for ROM update

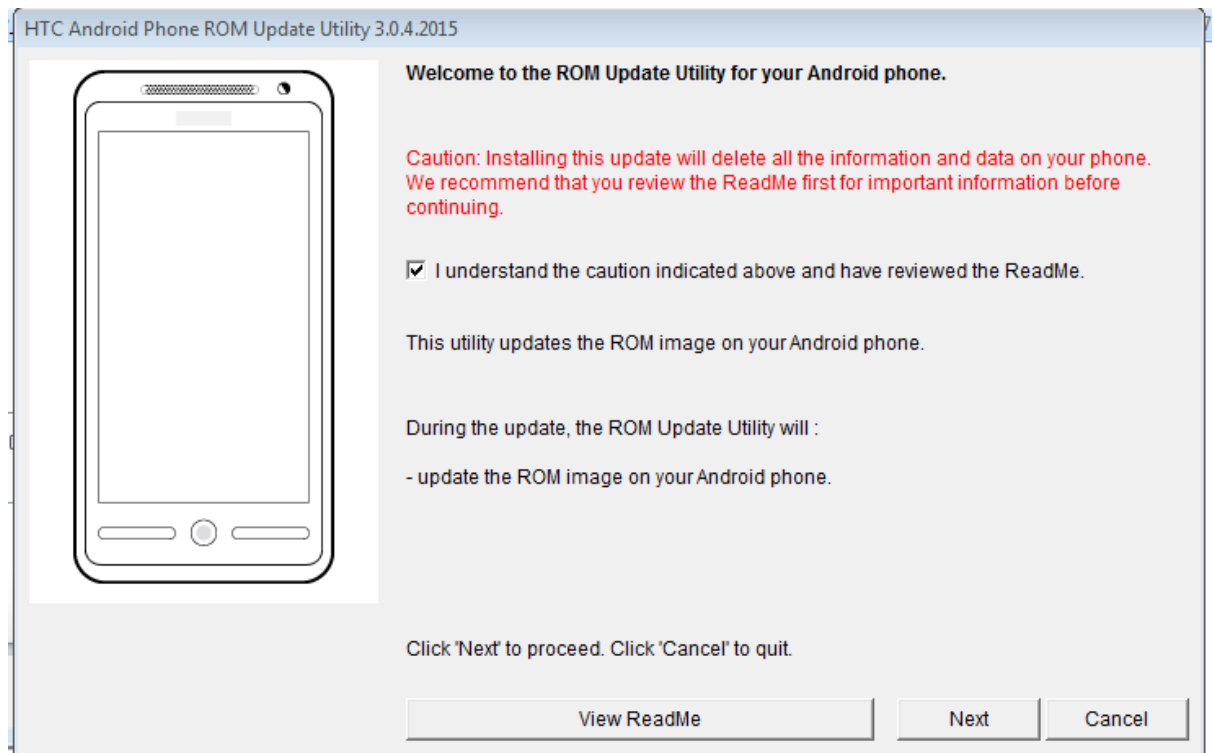

- 1) Device connected to USB type3
- 2) Device should be in developer mode (settings->about-> software information > More->build number -> tap build number until it says you're a developer)
- 3) Under 'settings' choose developer option and tick USB debugging
- 4) Wait until driver installed

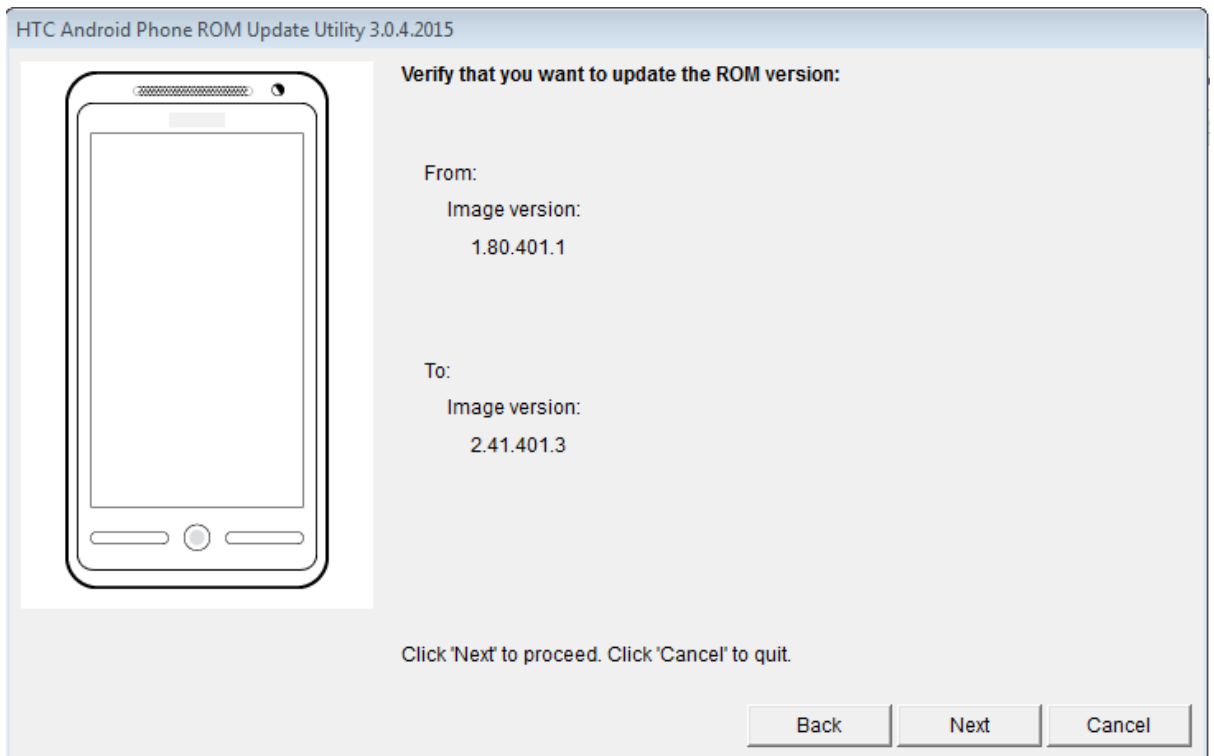

3) Double click the ROM and follow the instructions on the screen.

4) Existing ROM (1.80.401.1) or later

5)

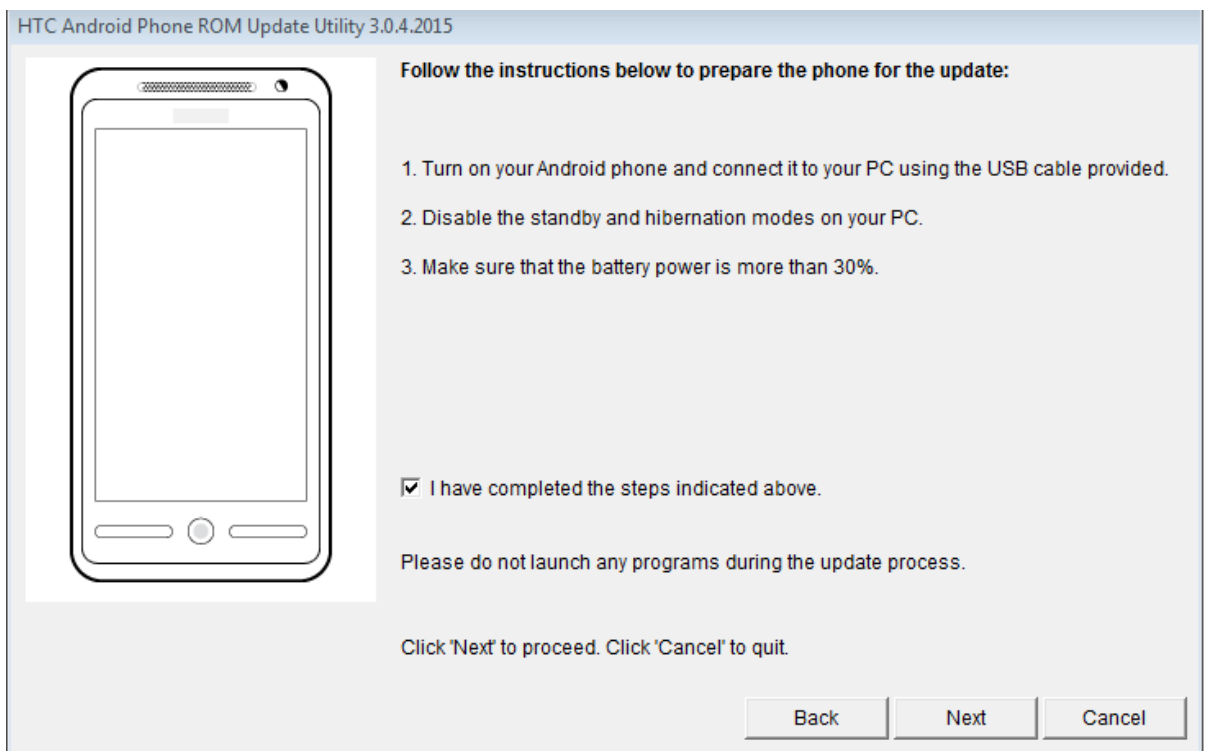

5)

After screen 5 , some times the driver may need to wait until the new driver update complete.

If ROM update stops after the device connected to laptop again double click the ROM update and follow the screen.

6)

7)If flashing stopped choose the recover option and follow the screen.
