Conventions used in this guide

In this user guide, we use the following symbols to indicate useful and important information:

- This is a note. A note often gives additional information, such as what happens when you choose to do or not to do a certain action. A note also provides information that may only be applicable to some situations.

- This is a tip. A tip gives you an alternative way to do a particular step or procedure, or lets you know of an option that you may find helpful.

- This indicates important information that you need in order to accomplish a certain task or to get a feature to work properly.

- This provides safety precaution information, that is, information that you need to be careful about to prevent potential problems.
Other helpful resources

For health, safety, and regulatory information, please read the Safety and regulatory guide that’s included in the box.

In addition to this user guide, you can find help information, FAQs, and more in www.htc.com/us/support.

To learn a lot more about using Windows® Phone, open Help + How-to on your phone. Or use your web browser and go to windowsphone.com.

Certain Windows Phone features or Microsoft® services may not be available in some countries or regions.
Getting started

Inside the box

You will find the following inside the box:

- Phone
- Battery
- USB cable
- Power adapter
- Quick start guide
- Safety and regulatory guide

Your phone

Front panel

- 1. POWER
- 2. Notification LED
- 3. Touch screen
- 4. BACK
- 5. START
- 6. Microphone
- 7. SEARCH
- 8. CAMERA
- 9. VOLUME UP and VOLUME DOWN
- 10. Front camera
- 11. Earpiece
Back panel

1. Dual LED flash
2. Back cover
3. RELEASE button
4. USB connector
5. 8 megapixel camera
6. Speaker
7. 3.5mm headset jack
Back cover

Removing the back cover

Remove the back cover to access the battery compartment and SIM card slot.

> Make sure to switch off your phone before removing the back cover.

1. Securely hold your phone facing up.
2. Press and hold the RELEASE button at the bottom of the phone, and then slightly lift the front panel.

This detaches the bottom part of the phone from the back cover.
3. Gently pull the phone out of its back cover.
Replacing the back cover

Your phone’s antennas are placed underneath the back cover. To get the best signal for calls, data connection, and GPS navigation, be sure to secure the back cover tightly to the phone.

1. Securely hold the back cover with the exposed side facing up.
2. Insert the top part of the phone into the back cover.
3. Press the phone down to lock the cover into place. You’ll hear a click when the back cover is locked in place.

SIM card

The SIM card contains your phone number, service details, and memory for storing phonebook contacts and/or text messages.

Inserting the SIM card

1. Take the back cover off.
2. Take out the battery.
3. Insert the SIM card with its gold contacts facing down and its cut-off corner facing out.

4. Push the SIM card all the way in.

Removing the SIM card

Make sure to switch off your phone before removing your SIM card.

1. Take the bottom cover off.
2. Take out the battery.
3. With your thumb, slide the SIM card out from the SIM card slot.
Battery

Your phone uses a rechargeable battery. How long the battery can last before it needs recharging depends on how you use your phone. The features and accessories you use can affect battery life. For example, leaving your Bluetooth® connection always on uses more power. Long phone calls and frequent web browsing use up a lot of battery power. Also, consider your location: poor signal strength from your mobile network and extreme temperature make the battery work harder.

Inserting the battery

Please use only original batteries that came in the box or replacements that we recommend.

1. Take the back cover off.
2. Insert the battery with its exposed copper contacts into the phone first. The exposed copper contacts should be on the left when you insert the battery.

Removing the battery

1. Take the back cover off.
2. With your thumb or finger, lift the battery from the battery compartment.
Charging the battery

Before you turn on and start using your phone, it is recommended that you charge the battery.

- Only the power adapter and USB cable provided in the box must be used to charge the battery.
- Do not remove the battery from the phone while you are charging it using the power or car adapter.

1. Insert the small end of the USB cable into the USB connector.

2. Insert the other end of the USB cable into the power adapter.

3. Plug in the power adapter to an electrical outlet to start charging the battery.

As the battery is being charged, the notification LED shows a solid orange light. The light turns to solid green when the battery is fully charged.

When you charge the battery and the phone is on, the charging battery icon is displayed in the status bar. After the battery has been fully charged, the charging battery icon turns to a full battery icon.

As a safety precaution, the battery stops charging when it overheats.

Switching the power on or off

Switching the power on

Press the POWER button. Easy.

When you turn on your phone for the first time, you’ll need to set it up.
Switching the power off

1. If the display is off, press the POWER button to turn it back on, then unlock the screen.
2. Press and hold the POWER button until you see the message, slide down to power off.
3. Swipe your finger down the screen.

Entering your PIN

Some SIM cards come with a PIN (personal identification number) set by AT&T.

If you’re asked for a PIN, enter it and then tap enter.

If you enter the wrong PIN three times, the SIM card is blocked. If this happens, you can unblock it with the PUK (PIN Unlocking Key) obtained from AT&T.

Finger gestures

<table>
<thead>
<tr>
<th>Gesture</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tap</td>
<td>When you want to type using the keyboard, select items onscreen such as apps and settings, or press onscreen buttons, simply tap them with your finger.</td>
</tr>
<tr>
<td>Press and hold</td>
<td>To open the available options for an item (for example, a contact or link in a web page), simply press and hold the item.</td>
</tr>
<tr>
<td>Swipe or slide</td>
<td>To swipe or slide means to quickly drag your finger vertically or horizontally across the screen.</td>
</tr>
<tr>
<td>Drag</td>
<td>Press and hold your finger with some pressure before you start to drag. While dragging, don’t release your finger until you have reached the target position.</td>
</tr>
<tr>
<td>Flick</td>
<td>Flicking the screen is similar to swiping, except that you need to swipe your finger in light, quicker strokes. This finger gesture is always in a vertical direction, such as when flicking the contacts or message list.</td>
</tr>
<tr>
<td>Rotate</td>
<td>On most screens, you can automatically change the screen orientation from portrait to landscape by turning your phone sideways. When entering text, you can turn your phone sideways to bring up a bigger onscreen keyboard.</td>
</tr>
<tr>
<td>Pinch</td>
<td>In some apps, like Pictures or the web browser, you can “pinch” the screen using two fingers (for example, thumb and index finger) to zoom in or zoom out when viewing a picture or web page.</td>
</tr>
</tbody>
</table>
Setting up your phone for the first time

When you switch on your phone for the first time, you’ll be asked to set it up. Just follow the onscreen instructions and you’ll be up and running in no time.

Be sure to sign in with your Windows Live® ID so you can use services such as Hotmail®, Marketplace, Xbox LIVE®, and more.

Start screen

Up front on the Start screen, you’ll see live tiles that continuously update and show what’s most personal to you. You’ll see things like your photo album, how many new messages and email you have, and more.

- Simply swipe your finger up or down to scroll through the tiles.
- On the Start screen, tap or swipe your finger left to access apps and settings.
- To return to the Start screen from any app or setting’s screen, press .

Rearranging tiles

1. Press and hold the tile you want to move until it floats.
2. Drag the tile where you want it to go.
3. Keep rearranging until all tiles are where you want them.
4. When you’re done moving tiles, tap anywhere onscreen or press .

Pinning items to the Start screen

You can pin just about anything you want to the Start screen: apps, pictures, songs, favorite websites, documents, and even contacts.

For example, when you pin a contact to the Start screen, you’ll get all of that person’s updates — feeds, email, text messages, and call notifications — right from that tile.

1. To pin something, press and hold it until a menu appears.
2. Tap pin to start.

Unpinning a tile

1. Press and hold the tile you want to remove.
2. Tap .
Basics

Adjusting the volume

1. Press the VOLUME UP or VOLUME DOWN button to make the volume bar appear.
2. Keep pressing until you get the volume level that you want.

Silencing your ringer

1. Press the VOLUME UP or VOLUME DOWN button to make the volume bar appear.
2. Tap 📲.

If the Vibrate option is on in the settings, your phone will change to vibrate mode. If it’s not, your phone will change to silent mode.

Sleep mode

Sleep mode saves battery power by putting your phone into a low power state while the display is off. It also stops accidental button presses when your phone is in your bag or pocket. You’ll still receive messages and calls though.

Switching to Sleep mode

Briefly press the POWER button to turn off the display and switch to Sleep mode. Your phone also automatically goes into Sleep mode when it’s idle for a while.

Waking up from Sleep mode

To wake your phone up manually, press the POWER button. You’ll need to unlock the screen.

Your phone automatically wakes up when you have an incoming call.
Lock screen

Unlocking the screen

Swipe your finger up to unlock the screen or answer an incoming call.

If you’ve set up a password in the settings, you’ll need to enter it to unlock the screen.

Changing your lock screen wallpaper

Browse the collection of preset wallpapers or choose from photos that you’ve taken with the camera.

1. On the Start screen, tap ⚡.
2. Tap Settings > lock + wallpaper.
3. Tap change wallpaper and then choose a preset wallpaper or a camera photo.
4. If the photo you selected is bigger than the allowable wallpaper size, crop the photo.
   
   To crop, drag the photo and position the part that you want to be your wallpaper inside the crop box, and then tap ✓.

Changing the ringtone

Choose from the preset ringtones.

1. On the Start screen, tap ⚡
2. Tap Settings > ringtones + sounds.
3. Tap the Ringtone box.
4. Listen to a ringtone by tapping the play icon beside its name.
5. Tap the ringtone you want to use.

**Changing the theme**

Feeling a little blue? You can change the screen’s background and accent colors to match your mood. The accent color you choose will appear in various places, like the tiles on the Start screen, app icons, on web links, in messages, and more.

1. On the Start screen, tap 🔄.
2. Tap Settings > theme.
3. Choose the background and accent colors that you like by tapping their respective boxes.

**Account setup**

Set up your online accounts such as your Windows Live, Outlook® (Exchange ActiveSync®), and Google® accounts so you can send and receive email.

Depending on the type of email account that you set up, other items such as contacts, calendar, or other information can appear on your phone as well. And when you sign in to your social networking accounts such as Facebook®, you’ll also get your friends’ status updates and see the pictures they’ve posted.

**Setting up an account**

1. On the Start screen, tap 🔄.
2. Tap Settings > email + accounts.
3. Tap add an account, and then tap the type of account you want to set up.
4. Enter your email address and password, and then tap sign in.

**Syncing an account**

If you’re not seeing your most recent email messages or status updates in an account, you can manually sync the account to download them.

1. On the Start screen, tap 🔄.
2. Tap Settings > email + accounts.
3. Press and hold the account whose information you want to download, and then tap sync.

**Deleting an account**

1. On the Start screen, tap 🔄.
2. Tap Settings > email + accounts.
3. Press and hold the account you want to delete, and then tap delete.
Switching between apps

Many apps can run at the same time, and there’s an easy way to switch between them all.

1. Press and hold ⇄ to see what apps are currently running.
2. Slide left or right across the screen to see all of the open apps, and then tap the one you want to use.

Windows Marketplace

In Windows Marketplace, it’s easy to download and purchase apps that fit your needs. A wide collection of free and paid apps is available, from everyday apps, powerful business apps, to fun games. You can also purchase songs.

From the Start screen, tap 📁 > Marketplace and start shopping.

Using speech on your phone

Make a call, send a text, or find a place by simply using your voice.

The speech feature may not be available in some countries or regions.

1. Press and hold 🌐.
   
   If this is your first time to use the speech feature, the screen will display some examples of things you can say. After reading the examples, tap accept (or tap speak).

2. Say an instruction, for example:
   - To call someone in your contact list, you can say Call Jennifer Singer, mobile.
   - To open an app such as Calendar, say Open Calendar.
   - To search for something on the Web such as pizza parlors, you can say Find pizza parlors.
   - If you need help, say What can I say? to view or listen to the various types of voice instructions you can use.
**Turning on more speech commands**

You can turn on additional speech commands in the settings, such as saving and dialing speed dial numbers. You can also set your phone to read aloud text messages and allow you to dictate your reply message without typing.

1. On the Start screen, tap 📱
2. Tap **Settings > ease of access.**
3. Tap the **Speech for phone accessibility On/Off** switch to turn on additional speech commands for phone calls. You’ll be able to use these commands:

<table>
<thead>
<tr>
<th>Command</th>
<th>Purpose</th>
</tr>
</thead>
<tbody>
<tr>
<td>Save speed dial</td>
<td>To assign a speed dial number</td>
</tr>
<tr>
<td>Call <em>number</em></td>
<td>To call a speed dial number</td>
</tr>
<tr>
<td>Turn call forwarding on/off</td>
<td>To turn call forwarding on or off</td>
</tr>
</tbody>
</table>

4. Press ← to return to the settings list.
5. Tap **speech.**
6. Make sure the **Play audio confirmations** switch is turned on. This makes your phone speak aloud to inform you of incoming phone calls.
7. To make your phone read text messages to you, tap the **Read aloud incoming text messages** box. Choose whether you want your phone to read text messages all the time, or only when you’re using a Bluetooth or wired headset.
Phone calls

Making a call

Some SIM cards come with a PIN (personal identification number) set by AT&T. If you’re asked for a PIN, enter it and then tap OK. If you enter the wrong PIN three times, your SIM card is blocked. Don’t worry. Just contact AT&T and ask for the PUK (PIN Unblocking Key).

1. On the Start screen, tap 📞.
2. Tap ☎️ to open the keypad.
3. Enter the number you want to call and then tap call.

To hang up, tap end call.

If you’re ready to hang up but the Phone dialer screen isn’t displayed anymore, tap the notification at the top of the screen, and then tap end call.

Making an emergency call

In some regions, you can make emergency calls even if you don’t have a SIM card installed or your SIM card has been blocked.

1. On the Start screen, tap 📞.
2. Tap ☎️ to open the keypad.
3. Dial the emergency number for your locale and then tap call.

If you enabled your password but forgot it, you can still make an emergency call without entering the password by tapping emergency call on the lock screen and then dialing the local emergency number.

Making an international call

1. On the Start screen, tap 📞.
2. Tap ☎️ to open the keypad.
3. Press and hold the 0 key until the + sign appears.

   The plus sign (+) shows that you’re making an international call (instead of entering the international access number for the country you’re in).
4. Enter the following on the keypad:
   - Country or region code
   - Area code (without the 0 at the beginning)
   - Phone number

5. Tap call.

Receiving calls

When you receive a phone call, the Incoming call screen appears.

Answering a call

- Tap answer.
- Or if the display is off and wakes up when you get a call, slide up from the bottom to unlock the screen first and then tap answer.

Rejecting a call

- Tap ignore.
- Or if the display is off and wakes up when you get a call, slide up from the bottom to unlock the screen first and then tap ignore.

Muting the ringing sound without rejecting the call

Do one of the following:
- Place your phone face down on a level surface.
- Press the VOLUME UP or VOLUME DOWN button.
- Press the POWER button to silence the ringer and turn the display off.

What can I do during a call?

When a call is in progress, use the onscreen buttons to turn the speaker on, put the call on hold, and more.

Turning the speaker on during a call

To decrease potential damage to your hearing, do not hold your phone against your ear when the speaker is on.

On the call screen, tap speaker.

To turn the speaker off, just tap speaker again.
Putting a call on hold
On the call screen, tap hold.
To resume the call, tap hold again.

Switching between calls
If you’re already in a call and accept another call, you can choose to switch between the two calls.

1. When you receive another call, tap answer to accept the second call and put the first call on hold.
2. To switch between the calls, tap the bar at the top of the screen.
3. To end the current call and return to the other call, tap end call.

Muting the microphone during a call
On the call screen, tap mute.
To turn the microphone back on, tap mute again.

Starting a conference call
Conference calling with your friends, family, or co-workers is easy. Make the first call (or accept a call), and then simply dial each subsequent call to add it to the conference.

- Make sure your SIM card has conference calling service enabled. Contact AT&T for details.
- The maximum number of people you can have on a conference call varies by mobile operator. Contact AT&T for details.

1. Make a call to the first conference call participant.
2. When connected, tap add call, and then call the second participant. The first participant is then put on hold.
3. When connected to the second participant, tap merge calls.
4. To add another participant, tap add call, and then call the person you want to invite.
5. When connected, tap **merge calls**.

6. To have a private conversation with someone in the call, tap **private**, and then tap the person’s name or number.
   - Tap **merge calls** to merge the other people back and continue the conference call.
   - Or to end the private conversation, tap **end call**.

To end the conference call, tap **end call**.

### Call history

Access the call history to check missed calls, your dialed numbers, and received calls.

#### Checking calls in the call history

1. On the Start screen, tap ![phone icon](image).
2. In the **history** list, you can:
   - Press and hold a number or contact name and delete it.
   - Tap a number or contact name to go to the **profile** list where you can choose to return the call, send a text message, save the number (if it's not yet stored in your contacts), and more.

#### Adding a new phone number from the call history to your contacts

1. On the Start screen, tap ![phone icon](image).
2. Tap the phone number that you want to save and then tap ![add contact](image).
3. Tap ![new contact](image) to create a new contact.
4. Edit the number if you need to, select the phone number type, and then tap ![add contact](image).
5. Add the contact name and other information and then tap ![add contact](image).

You can also save a phone number from the call history to an existing contact.

#### Clearing the call history

In the **history** list, you can:

<table>
<thead>
<tr>
<th>Remove a number or name</th>
<th>Press and hold the number or name, and then tap <strong>delete item</strong>.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Clear the entire history</td>
<td>Tap <img src="image" alt="more options" /> &gt; <strong>delete all</strong>.</td>
</tr>
</tbody>
</table>
Turning airplane mode on or off

In many countries, you are required by law to turn off wireless devices while on board an aircraft. A quick way to turn off wireless functions is to switch your phone to airplane mode.

When you enable airplane mode, all wireless radios are turned off, including the call function, data services, Bluetooth, and Wi-Fi. When you disable airplane mode, the call function is turned back on and the previous states of Bluetooth and Wi-Fi are restored.

1. On the Start screen, tap 📲
2. Tap Settings > airplane mode.
3. Tap the Status switch to turn it on or off.

When airplane mode is on, you’ll see the 📱 icon in the status bar.
People

Keeping in touch

The People hub is more than just your address book. It’s also where you can keep up with your social networks and stay in touch with the people you care about most.

1. On the Start screen, tap People.
2. Slide left and right across the screen to access your contacts list and see what’s happening with your contacts.

<table>
<thead>
<tr>
<th>all</th>
<th>Your contacts list. Just tap a contact to call, text, chat, write on a wall, or see that person’s updates and pictures. Tap a group to send a group message and see updates and pictures from the group members</th>
</tr>
</thead>
<tbody>
<tr>
<td>what’s new</td>
<td>Here’s where you can check out your contacts’ latest updates, all handily rolled together from your various social network accounts.</td>
</tr>
<tr>
<td>recent</td>
<td>Here you’ll see and get quick access to the contacts you’ve viewed or communicated with most recently.</td>
</tr>
</tbody>
</table>

Importing contacts from your SIM card

When you import contacts from your SIM card, they’re automatically synced to your Windows Live account. They won’t be deleted from the SIM card. If you haven’t set up a Windows Live account, your contacts are saved to the memory.

1. On the Start screen, tap People.
2. Tap 📡 > settings > import SIM contacts.

Adding a new contact

1. On the Start screen, tap People.
2. In the all contacts list, tap 📞.
3. Tap new contact.
4. Tap the account you want to create the contact in.
5. Tap each item (such as name, phone, email) and then enter the information.

   After entering information for each item, make sure to tap 📄 to save it.
6. Tap add photo to assign a picture or use the camera to take a picture of your contact.

7. When you’re done, tap 📋 to save the new contact.

Filtering your contacts list

You can filter the list to show contacts only from the accounts you choose.

1. In People, tap ☰️ > settings.
2. Tap filter my contact list.
3. Select the accounts from which you want to show contacts, and then tap 🔄.

Merging contact profiles

In People, you might have two or more versions of the same contact. This is usually because you have the contact’s profile on different social network or email accounts. In most cases, your phone will combine contact profiles automatically. For those that are not combined, you can link them manually.

1. Tap a contact that has one or more duplicate entries in the all contacts list.
2. Tap ☰️.
3. You can:
   - Under suggested links (if available), tap the one that you want to link to the contact.
   - Tap choose a contact and then tap one that’s a duplicate entry.

Unlinking contact profiles

1. In the all contacts list, tap the contact that has linked profiles.
2. Tap the link icon that shows the number of links 🔄.
3. Under linked profiles, tap the one that you want to unlink.
4. Tap unlink.
Searching, editing or deleting

Searching for a contact

If your contacts list is especially long, search is probably the quickest way to find a contact.

1. In the all contacts list, tap 📞.
2. In the search bar, enter the first few letters of the first or last name of the contact you’re looking for.
   Matching contacts are then displayed.
3. Tap the contact to view the person’s contact information.

Skipping to a letter of the alphabet

Tap any of the letter tiles in the all contacts list to display all the tiles for the whole alphabet. Tapping any one of these allows you to quickly jump to contacts whose names begin with that letter.

Editing a contact’s information

Contacts from Facebook, Twitter™, or LinkedIn® cannot be edited. But you can add information, and then save it to a different account (such as Windows Live).

1. In the all contacts list, tap the contact whose information you want to change.
2. Tap 📞.
3. If this is a linked contact (someone with multiple accounts that show up as one entry in your contacts list), tap the account you want to edit (for example, tap edit Windows Live).
4. Edit or add new information for the contact.
   After entering new information for an item, remember to tap 📞 to apply the changes.
5. When you’re done, tap ✅ to save the changes.
Deleting a contact

While you can't delete a Facebook, Twitter, or LinkedIn contact on your phone, you can delete contacts from other services. When you do this, the contact will be deleted both from your phone and from the online service where it's stored.

1. In the all contacts list, tap the contact you want to delete.
2. Tap > delete.
3. If the contact is a linked contact (someone with multiple accounts), choose which account to remove the contact from.

You can also press and hold a contact and then tap delete.

Contact groups

Groups help you cut through social networking clutter to stay in touch with the people who matter most — family, friends, your bowling league. When you create a group, it shows up at the top of your contact list.

Tap it, and you'll see the group members and their social networking updates, along with options for group email, texting, and chat.

Creating a new group

1. On the Start screen, tap People.
2. In the all contacts list, tap .
3. Tap new group.
4. Enter a group name.
5. Tap add contact and then choose a contact to add to the group.
   Repeat this to add more contacts to the group.
6. When you're done, tap .

Press and hold a group to pin it to the Start screen.
Editing a group

1. Tap the group you want to edit and then tap 🔍.

2. You can:
   - Change the group name.
   - Add more contacts to the group.
   - Remove someone from the group. Tap the member, and then tap remove from group.
   - Change the preferred contact number or email address for a member. Tap the member, tap the information you want to change, and then tap 📋.

Deleting a group

Press and hold a group, and then tap delete.

What is the Me card?

The Me card is your profile. It’s also your one-stop shop for social networking. You can access the Me card either from the Start screen or the People hub.

- On the Start screen, tap Me.
- On the Start screen, tap People. Tap your profile picture.

Here are some things you can do:

- Post a new message on your social networks.
- See, comment on, and like social network posts.
- Reply to or retweet updates on Twitter.
- Update your profile picture on Facebook and Windows Live.
- Set your chat status. Let other people see when you're available on instant messaging.

Posting to social networks

You can post messages to your social networks and comment or like other people’s posts. You can also check in to share your location with friends.

Go to Settings > email + accounts to check what types of social network accounts can be set up on your phone.

Posting a message

1. On the Start screen, tap Me.
2. Tap post a message and then type your message.
3. If you have more than one social network account, tap the Post to text box, choose which accounts to post to, and then tap √.

4. Tap ☑.

**Commenting or liking someone's post**

1. On the Start screen, tap People.
2. Slide left or right to go to what's new so you can see recent posts from your contacts.
3. When you see a post you want to comment on or like, tap +.
4. You can:
   - Tap the box that says add a comment, type your comment, and then tap ☑.
   - Tap ☑ to like (or tap ☑ to unlike).

**Checking in on Facebook or Windows Live**

When you check in to a place, you share your location with your contacts by posting it on one or more of your social networks. You can find nearby locations, or you can add one yourself.

1. On the Start screen, tap Me.
2. Tap check in.
3. Do one of the following:
   - Tap a place in the list to check in from there.
   - If you don’t see your location listed, tap ☑ to make the app find your location. Type the name of the place where you’re at, and then tap ☑.
   - To search for a nearby place, tap ☑, type the name of the place, and then tap ☑.
4. Once you’ve found the place you want to check in from, choose each account you want to check in on.
5. Tap ☑ to check in.
Filtering social updates

Flooded with updates? Try viewing posts from one social network at a time. Or you can hide the updates from one or more of your social networks.

- In People, slide left or right to go to what's new. Tap all accounts, and then tap the account you want to view posts from.
- Or tap ••• > settings, and then select Only show posts from people visible in my contact list.

Posts from the social networks you've filtered out of your contacts list will no longer be visible.
Keyboard

Using the onscreen keyboard

When you start an app or select a field that requires text or numbers, the onscreen keyboard becomes available.

Tap anywhere onscreen where you can type and the keyboard appears automatically.

![Onscreen keyboard diagram]

After you've finished using the keyboard, press \( \leftarrow \) to close it.

Turning caps lock on

Press and hold or double-tap the shift key \( \uparrow \). Tap it again to turn caps lock off.

Entering numbers and symbols

1. Tap \( \text{123} \) to switch to the numeric and symbol keyboard. You'll find numbers, common punctuation marks, and symbols on the keyboard.

2. To use more symbols, tap \( \rightarrow \).

3. Some of the symbol keys can bring up even more symbols. Press and hold a symbol to see more.

For example:

- Press and hold a symbol key such as the left parenthesis key, and then slide to another symbol that you want.

![Symbol keyboard diagram]

- Press and hold the period key to bring up some of the common punctuation options, and then slide to the one that you want.

- Press and hold the $ key to see more options for currency symbols, and then slide to a currency.
Moving the cursor

To place the cursor in the middle of the text you’ve already entered, press and hold near the text you want to change until a cursor appears, and then drag your finger to move the cursor exactly where you want it.

Entering words with predictive text

The onscreen keyboard has predictive text to help you type quickly and accurately. Predictive text input is enabled by default, and word suggestions are displayed as you type.

To enter a word in predictive mode:

- If you see the word you want highlighted in bold, just tap the space bar to insert the word into your text.
- If you see the word you want shown in the suggestions before you have finished typing the entire word, tap the word to insert it into your text.
- Slide across the suggestion bar to see more words.
- If you mistyped something or chose the wrong word, just tap that word to display the suggestion bar and choose the right word.

Changing the keyboard language

You can choose between a variety of languages, layouts, and regions for your keyboard. Your phone can provide word suggestions and spelling corrections based on the language you choose.

1. On the Start screen, tap 📱.
2. Tap Settings > keyboard.
3. Select the languages you’d like to be able to use from the onscreen keyboard. The next time you use the keyboard, you’ll see the language key 🇹Ｍ.
4. While using the onscreen keyboard, tap the language key 🇹Ｍ to switch between the languages you’ve selected.
Messaging

Texting and chatting in one place

With the Messaging app, you can both text and chat in one place.

Whether your friends and family are on their mobile phone or at their computer, you can send them text messages, Windows Live instant messages, or start a Facebook chat.

- To chat on Messenger, you need to set up your Windows Live account first.
- To chat over Facebook, you need to set up your Facebook account. Also, make sure to turn on Facebook chat in the Messaging app’s settings.

1. On the Start screen, tap **Messaging**.
2. If you want to send an instant message over Windows Live Messenger, set your chat status first, if you haven’t done so.
3. Tap **+**.
4. Tap **+**, choose a contact, and then tap the contact’s phone number, Messenger, or Facebook to determine how you want to send the message.
   Repeat to add more recipients, and their names will be added automatically in the **To** box.
5. Tap the box that says **type a message**, and then enter your text.
6. Tap **send** to send it.

When adding recipients, you can also:
- Tap +, and then select a contact group. The Group text option in the app’s settings is turned on by default and can help keep replies in one thread when you’re texting with a group of people. When it’s turned on, replies are sent as multimedia messages instead of text messages.

- Begin typing a person’s name in the To box, and then tap a matching contact name. The contact info you choose or enter determines if the message is sent as a text message or instant message over Messenger or Facebook. Repeat to add more recipients.

- Enter a mobile phone number or email address in the To box. To enter additional recipients, tap Enter after each one.

**Setting your chat status**

1. On the Start screen, tap Messaging.

2. Tap ☰, and then tap a status.

   For example, tap available to sign in so that your family and friends will see you online in their Windows Live Messenger.

   You can also set your chat status from the Me card.

After you set your chat status and sign in, you’ll see who’s online in the Messaging app. Tap a contact to send the person an instant message.

**Sharing a picture in a message**

You can send a multimedia message by attaching a picture to a text message. You can also send a picture in an instant message on Windows Live Messenger or Facebook.

Sending multimedia messages may incur additional charges, and this service must be available on your data plan.

1. On the Start screen, tap Messaging.

2. Tap ☰ to create a new message.

3. In the To box, fill in the recipient’s name, mobile phone number, or email address.

4. Tap ☰. You can:
   - Select an existing photo to attach to your message.
   - Or tap ☰ to take a photo and attach it.

5. Enter your message.

6. Tap ☰ to send.
Viewing and replying to a message

When you receive a new message, you'll hear a notification sound (if set) and see the message briefly display at the top of the screen.

1. To open and read the message, you can:
   - Tap the message bar at the top of the screen.
   - Or open the Messaging app to access and read the message.
2. Tap 📩, and then choose whether to reply with a text, Messenger, or Facebook message.
3. Enter your reply, and then tap 📩.

Why can’t I reply to my friend using Facebook or Messenger on the same thread?

If you’re friends with someone on Facebook or Messenger, you may have several different contact profiles for the same person. Their phone number, Facebook, and Messenger info may be stored as different contacts on your phone. In this case, you need to link these contacts manually.

Open the People app and link them.

Copying and pasting a message

You can copy a previous message and paste it into the new message you’re composing.

1. In the threads list, tap a contact (or phone number) to display the exchange of messages with that contact.
2. Press and hold the message you want to copy, and then tap copy.
3. Tap the text box where you’re composing your new message.
4. To paste the copied message, tap 📦.
Managing conversations

Forwarding a message

1. In the threads list, tap a contact (or phone number) to display the exchange of messages with that contact.
2. Press and hold the message you want to forward, and then tap forward.
3. Fill in the recipient.
4. Tap to send.

Deleting a message

1. In the threads list, tap a contact (or phone number) to display the exchange of messages with that contact.
2. Press and hold the message you want to delete, and then tap delete.

Deleting a whole conversation

In the threads list, press and hold a contact (or phone number) whose messages you want to delete, and then tap delete.
Email

Adding your Windows Live account

When you first set up your phone, you’re asked to sign in with your Windows Live ID. If you didn’t sign in then or if you have more than one Windows Live ID, go to the settings to set up your primary Windows Live ID or additional Windows Live IDs.

1. On the Start screen, tap 📦.
2. Tap Settings > email + accounts.
3. Tap add an account > Windows Live.
4. Enter your Windows Live ID and password, and then tap sign in.

Your Windows Live email, contacts, calendar, photos, and feeds will be synced to your phone.

- The first Windows Live account that you set up can't be deleted from your phone.
- If you set up additional Windows Live IDs, photos from these accounts won't be synced to your phone.

Adding a POP3/IMAP email account

1. On the Start screen, tap 📦.
2. Tap Settings > email + accounts.
3. Tap add an account.
4. Choose the type of email account that you want.
   - If you don’t see it in the account list, tap other account.
5. Enter your email address and password, and then tap sign in.

Your phone then looks for your account settings, completes the setup, and syncs information from your account.
If what you've set up is your Google Account, your phone will sync and download your Gmail™ as well as your Google contacts and calendar from your account.

If you've set up other POP3 or IMAP accounts, your phone will sync email from those accounts.

If your phone can't find your account settings, go to the advanced setup to enter the incoming and outgoing server and other settings manually. You'll need to get these information from your email provider.

Adding a Microsoft Exchange ActiveSync account

1. On the Start screen, tap 📞.
2. Tap Settings > email + accounts.
3. Tap Outlook.
4. Enter your email address and password, and then tap sign in.

If your account settings are found, wait for your phone to finish syncing with your work email, contacts, and calendar.

If your account settings can't be found, follow the onscreen instructions to enter your Exchange ActiveSync account settings manually. Ask your Exchange Server administrator for these settings.

Checking email

After you've set up your email accounts, a new tile for each account will be added to the Start screen.

1. To open an email account, tap its tile on the Start screen.
2. In the all email list, scroll up or down to skim through your email messages. Email messages are neatly grouped into conversations. If there were back and forth replies to an email, tapping that email expands and shows its series of messages.
3. Tap an email message to open and read it.

If you have a long email list, you can also slide left or right to skim through unread, flagged, or urgent email only.
Responding or forwarding email

1. Open and read the email message.
2. Tap \( \mathbb{E} \).
3. Choose whether to reply only to the sender, reply to all, or forward the email.

Linking inboxes as one

To check your email from all your accounts just in one place without having to switch to different accounts, you can link your inboxes as one.

1. Tap \( \bullet \bullet \bullet > \text{linked inboxes} \).
2. Under other inboxes, tap one or more email accounts that you want to combine to your unified inbox.

   The default name for your unified inbox is Linked inbox.

3. Tap rename linked inbox if you want to change the name of your unified inbox.

4. Press \( \Leftarrow \) to return to your inbox. You’ll now see just one inbox containing all your email from your different accounts.

Next time you want to check your email, tap Linked inbox on the Start screen or in the apps list.

Unlinking an inbox

1. Tap \( \bullet \bullet \bullet > \text{linked inboxes} \).
2. Under this inbox, tap the email account you want to remove from the unified inbox.

3. Tap unlink.

Sending email

1. Open the email account that you want to use for sending your email.
2. Tap \( + \).
3. Fill in one or more recipients. In the To field, you can:
   - Tap \( + \) to choose a contact. Tap it again to add more.
   - Start typing a person’s name or email address. If there are matches found from your stored contacts as you type, they will be listed. Tap the one that you want.
4. Enter the subject and compose your message.
5. To attach a picture, tap 📸.
6. When you’re ready to send your email, tap ✉️.

- When entering several email addresses manually, separate them with a semicolon.
- To send a carbon copy (cc) or blind carbon copy (bcc), tap 📧 > show cc & bcc and add other recipients.

**Setting the priority for an email message**

You can set the priority for an email message before sending it.

1. While composing the message, tap 📧 > priority.
2. Select the priority for the message.

**Saving or discarding the email**

1. While composing your email, tap ✖️.
2. Choose whether to save your email as a draft or delete it.

**Resuming an email draft**

1. While in the email list, tap ⬇️ > folders > drafts.
2. Tap the draft email to edit it.
3. Send the email.

**Managing email messages**

**Deleting, moving, flagging, or marking several email messages**

1. Tap 📧.
2. To quickly select all email messages in a conversation, select the top one (the one that shows the subject and number of messages).
   Or to select individual email messages, tap their respective check boxes.
3. Choose what you want to do with the selected messages.
   - Tap ⏹️ to delete.
   - Tap ⏹️ to move them to another mail folder.
   - Tap ⬤ and choose whether to flag or mark the messages as read or unread.

You can also just tap on the far left of an email to select the email first. Check boxes will then appear and you can select more email messages.
Deleting, moving, flagging, or marking one email

1. Press and hold a conversation or a single message.
2. On the options menu, choose what you want to do with the whole conversation or the single message.

Switching to another mail folder

1. Tap > folders.
2. Tap show all folders to see all the available mail folders.
3. Tap the mail folder whose email messages you want to view.

Changing email account settings

1. On the Start screen, tap the email account that you want.
2. Tap > settings.
3. Tap sync settings to choose how often to download items or change the items that you want to sync.
4. Choose if you want a signature to appear in your sent email.
5. Tap ✓.
Camera basics

Whether traveling for business or fun, enjoy taking photos and videos with the camera.

- From the Start screen, tap 📷 > Camera to open the Camera app.
- Or press the CAMERA button.

The first time you open the Camera app, you’ll be asked whether you want to let it use your location. If you allow this, location information will be stored in your captured photos and you’ll be able to know where they were taken. When you share your photos, other people can also see that information.

Did you know you can open the Camera app even if the display is off or locked? Just press and hold the CAMERA button.

Viewfinder screen

You’ll find the following onscreen controls on the Viewfinder screen:

Flash and other settings are not available when you’re using the front camera.

Zooming

Before taking a photo or video, you can first use the onscreen zoom control to zoom in or out of your subject.

Simply tap + or - on the screen to zoom in or out.
Changing settings

1. Tap 📷 to choose from various settings such as flash mode, resolution, effects, and more.

2. To save your changed settings, tap Save settings after you make the change. Otherwise, the camera will return to the default settings the next time you use it.

When you go to settings > applications > pictures + camera from the Start screen, you’ll find more settings that can change how the CAMERA button functions, where to share photos and videos, and more.

Taking a photo

1. Open the Camera app.

2. Tap 📷.
   - Tap one of the flash icons to set the camera to auto flash, flash on, or flash off.
   - Choose the resolution and other settings you want to use.

3. Hold your phone steady, either vertically (portrait view) or horizontally (landscape view).

   If you’re taking a photo of a group of people, the camera will automatically recognize faces and adjust the focus. You’ll see boxes on people’s faces.

4. Before taking the photo, you can zoom in and out first on your subject.

5. To take the photo, you can:
   - Press the CAMERA button halfway down to focus, and then press the button all the way down to take the photo. The camera will auto focus on what’s in the center of the screen (or on people’s faces) and take the shot.
   - Or tap any point on the screen to focus there and take the photo. The camera will auto focus and apply auto exposure on what you tapped.

The photo will be saved in the Camera Roll album of the Pictures hub.
Recording video

You can record videos in either portrait or landscape orientation. For the best viewing experience of your videos, the most ideal way is to capture them in landscape.

1. Open the Camera app.
2. Tap 📹 to switch to video mode. You'll see a video counter on the screen.
3. Tap 🌟
   - Tap one of the light bulb icons to switch the camera light on or off during recording.
   - Choose the resolution and other settings you want to use.
4. Before recording, you can zoom in and out first on your subject.
5. Press the CAMERA button to start recording.
   While recording, the camera will always auto focus on what’s in the center of the screen if **Continuous Focus** is enabled in the settings.
6. To stop recording, press CAMERA again.

The video will be saved in the **Camera Roll** album of the Pictures hub.

---

**Camera flash doesn’t turn on?**

Camera flash drains the battery. To save battery power, the camera disables the flash (even when you have set the flash mode to auto flash or flash on) when one of the following occurs:

- **You’re on a phone call.**
  The flash will be disabled temporarily when you’re on a phone call. After the call ends, you’ll be able to use the flash again.

- **Battery level reaches 20% or lower.**
  Recharge the battery so that the camera can have enough battery power to use the flash.

- **Cold weather may lower battery performance which affects the flash.**
  To make sure the camera has enough battery life to power up the flash, keep your phone warm. When not in use, put the phone inside your jacket to keep it warm, and try to avoid sudden temperature changes that may affect battery performance.
After capturing

After taking a photo or video, you can view it and others you've captured without leaving the Camera app. You can also choose what to do with a photo or video, such as upload or send it.

1. While on the Viewfinder screen, press 📷. Or slide your finger on the screen. You'll see the photo or video you last captured.

2. If it's a photo, double-tap or pinch and stretch if you want to zoom in and out of a photo. If it's a video, just tap the play icon to view the recording.

3. Tap 📷 montage to see options of what you can do with your photo or video. You can choose to delete it, upload to Facebook or SkyDrive®, and more.

4. Pinch the screen to change to filmstrip view. You can then easily flick left or right onscreen to browse through your photos and videos.

5. To continue capturing, slide your finger left if you're holding the phone horizontally (or slide up if holding the phone vertically) until you're back on the Viewfinder screen.

Taking a panoramic photo

Whether it's the Golden Gate Bridge or the Eiffel Tower, you can capture anything wide or tall in a single photo. The camera lets you take up to three shots to create your panoramic photo.

1. While on the Viewfinder screen, tap 📷 > Panorama Shot.

2. While pointing the camera on your subject, hold your phone steady. Align the dotted line with the solid line onscreen.

*When you're using panorama mode, zooming, flash, touch focus, and touch capture are not available. Settings such as brightness and exposure are set to auto.*
3. When you’re ready to capture the first shot, press the CAMERA button.
   A message then appears, guiding you in what direction you should move to take
   the next shot. As you move, directional arrows appear.

4. Using the directional arrows, dotted line, and circles onscreen as your guidance,
   pan left or right in landscape view (or pan up or down in portrait view). When
   the ring reaches and centers on the next circle, the camera automatically takes
   the shot.

5. Do the same thing to take the last shot.

The camera stitches your shots into a single photo.

Press the CAMERA button or tap 📷 anytime if you want to stop taking more shots.
The camera stitches only those shots that were captured.

Tap 📷 to view the panoramic photo you’ve just taken. If you want to delete it and
start over, tap 📷 > delete.

Press the ← button to quit panorama mode and resume the normal photo mode.

## Taking continuous photo shots

Is your subject in motion? Use burst mode to take consecutive shots.

1. While on the Viewfinder screen, tap 📷 > Burst Shots.

When you’re in this mode, flash and touch focus are not available. Other settings
such as brightness and exposure are set to auto.

2. Point the camera and focus on your subject.

3. When you’re ready to take the photo, press the CAMERA button.

The camera takes five consecutive shots of your subject.

Press the ← button to quit burst mode and resume the normal photo mode.
Photos, videos, and music

Pictures

About the Pictures hub

On the Pictures hub, you can view the photos and videos you captured with the camera, flip through online albums (from Facebook and SkyDrive), or catch up with your friends’ latest snapshots.

1. On the Start screen, tap 📷.
2. Tap Pictures.
3. Slide left or right across the screen and you’ll see the following:

<table>
<thead>
<tr>
<th>Feature</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>picture</td>
<td>You can view your pictures and videos by album or date, or see what’s on the</td>
</tr>
<tr>
<td>collection</td>
<td>camera roll. You can also check out your friends’ online albums or your own.</td>
</tr>
<tr>
<td>favorites</td>
<td>See up to 8 pictures you’ve tagged as favorites, or tap see all to view the</td>
</tr>
<tr>
<td></td>
<td>rest. You can even pin your favorites to the Start screen for one-tap access.</td>
</tr>
<tr>
<td>what’s new</td>
<td>Here you’ll find the latest pictures your social networking friends have</td>
</tr>
<tr>
<td></td>
<td>uploaded. Tap one to post a comment or tag a face.</td>
</tr>
</tbody>
</table>

Adding a photo to your favorites

Some snapshots are so great you just can’t get enough of them. To get to these photos quicker, add them to your favorites.

1. On the Pictures hub, find a photo you like and tap to open it.
2. Press and hold the photo, and then tap add to favorites.

Before you can add a photo from an online album to your favorites, you first need to save it to your phone. Open the photo, and then tap 📷 > save to phone.

Changing the background on the Pictures hub

You can pick out any photo to use as the background on your Pictures Hub — even photos from online albums. Better yet, your Pictures hub can also show a rotating selection of your favorite pictures.

1. On the Start screen, tap 📷.
2. Tap Pictures.
3. Tap 💼

4. You can:
   - Choose a photo to use as the background. Tap **choose background**, select a photo, and crop it.
   - Tap **shuffle background** to just shuffle photos that are tagged as favorites.

If you have the Pictures tile on your Start screen, the background you choose will also show up in the tile.

**Sharing**

Share photos or videos with your friends and loved ones. You can send a photo in a multimedia message. Or send any photo or video by email. You can also upload a photo or video to your social networking sites.

- Make sure you’ve signed in to your social networking accounts before uploading.
- You can share photos on SkyDrive, Facebook, or Twitter.
- You can share videos on SkyDrive or Facebook.

1. On the Pictures hub, find and open the photo or video you want to share.
2. Tap 📷 > **share**.
3. Choose how to send it or where you want to share it.

**Using Photo Enhancer**

Photos need a bit of touch-up? Improve photos taken in poor lighting conditions with one tap. Or apply special effects to give your photos a unique touch.

If this app is not preinstalled on your phone, open the HTC Hub and download this free app.

1. On the Start screen, tap 📷
2. Tap **Photo Enhancer**.
3. Tap **choose picture**.
4. Open the album where the photo you want to edit is located, and then tap the photo.
5. To see what’s available, slide left or right across the thumbnails of the various effects.
6. Tap an effect to apply it to your photo.
7. Tap 📝 to save.

The enhanced photo will be saved in another album called **Saved Pictures**.
Music + Videos

Playing music, videos, and podcasts

Listen to music, catch up on your favorite podcasts on your commute, or enjoy a movie on your next flight.

If you don’t have music, videos, or podcasts yet, connect your phone to your computer and use the Zune® software to sync them first to your phone.

1. On the Start screen, tap 📱.
2. Tap Music + Videos.
3. Under zune, tap music, videos, or podcasts.
4. Slide left or right to different categories (such as artists or albums when browsing through music).
5. Tap the item that you want to play. The playback screen opens and starts to play the music, video, or podcast.
6. Use the onscreen controls to control the playback.
7. When you’re done, keep pressing ⏪ until you’re back on the main screen of the Music + Videos hub.

Listening to FM radio

Tune in to your favorite station or catch the news.

You need to connect a stereo headset first to the audio jack of your phone. Your phone uses it as the FM radio antenna.

1. On the Start screen, tap 📱.
2. Tap Music + Videos.
4. Press the VOLUME UP or VOLUME DOWN button to show the mini playback controls. Use them to go to the next or previous station, pause, or resume the radio.

When choosing stations, you can also:

- Swipe left or right to go to a radio station.
- If you flick instead of swipe, the radio jumps to the strong stations and skips over weak stations.
Adding or removing a favorite station

To quickly tune into radio stations that you like, add them to your favorites.

1. Tune in to a station.
2. Tap 🌟 to add the station as a favorite. To remove from your favorites, tap 🌟.

Listening to a favorite station

1. If you’ve added some favorite stations, tap 🌟 to see them.
2. Tap a favorite station in the list.
Syncing

Why do I need the Zune software?

Install the Zune software on your computer so you can get the most out of your phone.

Here are the top 3 reasons why you need to install the Zune software:

- To download stuff (such as music, videos, movies, TV shows, podcasts, apps, and games) from Zune Marketplace to your computer.
- To sync stuff between your computer and your phone. This includes the pictures, music, videos, movies, TV shows, and podcasts on your computer that you want to copy to your phone. It also includes the pictures and videos you’ve taken on your phone that you want to copy to your computer.
- To update your phone software (to get new features, performance enhancements, and so on).

There are a lot of other things you can do with the Zune software. For example, you can use it to rip audio CDs, import an iTunes® library, and find out what music your friends are listening to. For more info, go to Zune.net.

Installing and setting up the Zune software

In most cases, you’ll be prompted to install Zune the first time you connect your phone to your computer. If you aren’t prompted, download the software from the Web and install it on your computer.

1. On your computer’s web browser, go to the Zune download page and click the download button. Follow the instructions to download and install.
2. After you’ve finished installing the software, connect your phone to your computer using the supplied USB cable. Zune automatically opens on your computer.
3. Wait for Zune to recognize your phone, and then follow the onscreen instructions to set it up.

Zune cannot be installed and used on a Mac. If you’re using a Mac computer, you need to use Windows Phone 7 Connector for Mac to sync multimedia files between your phone and your computer and to download available phone updates. Go to the Windows Phone 7 Connector for Mac download page.
Syncing pictures, music, and videos

After setting up Zune on your computer, choose what you want to sync with your phone.

- If you don’t have music, videos, or podcasts on your computer yet, get them first from Marketplace.

1. Connect your phone to your computer using the supplied USB cable.
   Zune automatically opens on your computer, if you haven’t opened it.

2. On top of the Zune screen, click collection.

3. Find the item you want to sync. You can:
   - Click a category (music, videos, pictures, or podcasts), and browse until you find the item you want to sync with your phone (such as a song, album, artist, playlist, genre, and so on).
   - In the search box, enter what you’re looking for (for example, a song title or artist name). In the search results, click the desired item.

4. Drag the item to the phone icon at the bottom left side of the screen.

- If you have captured photos and videos on your phone, they will automatically be copied to your computer when you sync with the Zune software.

Changing sync options

If you want more control over what gets synced between your phone and computer, try experimenting with the Zune software sync options. For example, if you don’t want to bother dragging individual songs, artists, or albums to the phone icon, you can configure the Zune software to auto sync all music on your computer with your phone (space permitting).

1. In the Zune software, click Settings > Phone > Sync Options.

2. Click the items that you want to change (for example, in the Music section, click All), and then click OK.
Setting up wireless sync

If you don’t want to physically connect your phone to your computer every time you need to sync, you can set up your phone to automatically sync with your computer over your home Wi-Fi network.

Wireless sync is not supported on workplace Wi-Fi networks.

1. Connect your phone to your computer using the supplied USB cable.
2. In the Zune software, click Settings > Phone > Wireless sync.
3. Follow the onscreen instructions in the Zune software.

Files on your computer will then auto sync with your phone wirelessly when:

- Your phone battery has at least a medium-level charge and your phone is connected to the supplied power adapter (that is, your phone must be connected to the wall charger and not connected to your computer).
- You’re not interacting with your phone. For example, you’re not touching things on the screen, the backlight is off, and music and videos aren’t playing.

It might take up to 15 minutes for wireless sync to start, and there is no way to manually force it to occur. For more information about wireless sync, see Zune.net.
Internet connections

Data connection

When you turn on your phone for the first time, it will be automatically set up to use the mobile network of AT&T.

Turning the data connection on or off

Turning your data connection off can help save battery life and save money on data charges. However, if you don’t have data connection turned on and you’re also not connected to a Wi-Fi network, you won’t receive automatic updates to your email, social network accounts, and other synchronized information.

1. On the Start screen, tap Settings.
2. Tap Settings > cellular.
3. Tap the Data connection On/Off switch.

Enabling data roaming

Connect to the partner networks of AT&T and access data services when you’re out of AT&T coverage area.

Using data services while roaming will be costly. Check with AT&T for data roaming rates before you use data roaming.

1. On the Start screen, tap Settings.
2. Tap Settings > cellular.
3. Tap the Data roaming options box, and then tap roam.
Wi-Fi

Wi-Fi provides a fast, seamless connection at home, in the office, and in thousands of AT&T hotspots. Using Wi-Fi is convenient and helps you save on your mobile data usage.

The availability and strength of the Wi-Fi signal will vary depending on objects, such as buildings or simply a wall between rooms, the Wi-Fi signal has to pass through.

Connecting to a Wi-Fi network

1. On the Start screen, tap 🔄.
2. Tap Settings > Wi-Fi.
3. Tap the Wi-Fi networking On/Off switch to turn Wi-Fi on. You'll then see a list of available wireless networks.
4. Tap the wireless network you want to connect to.
   - If you selected an open network, your phone will automatically connect to the network. (Some Wi-Fi networks, such as ones you might find in coffee shops, restaurants, hotels, or elsewhere, may require you to enter a password in your web browser before you can connect.)
   - If you selected a secured network, enter the required password and then tap done.

When you're connected to a wireless network, the Wi-Fi connected icon 🔄 appears in the status bar and shows you the signal strength (indicated by the number of bands that light up).

The next time you connect to the same secured wireless network, you won't be asked to enter the password or other security information again, unless you do a factory reset.

Connecting to a hidden Wi-Fi network

A Wi-Fi network might be hidden, which means the network name isn't broadcasted. In this case, it won't appear in the list of available networks on the Wi-Fi Settings screen and a notification won't appear when the network is in range. To connect to a hidden Wi-Fi network when it's in range, you'll need to enter the network name and password.

The network name and password are case sensitive.

1. On the Start screen, tap 🔄.
2. Tap Settings > Wi-Fi.
3. Make sure that Wi-Fi is turned on.
4. Tap advanced.
5. Tap +, enter the network name, and then tap add.
6. On the Sign in screen, enter the password, and then tap done.

**Disconnecting from a Wi-Fi network**

1. On the Start screen, tapVED.
2. Tap Settings > Wi-Fi.
3. Tap the Wi-Fi networking On/Off switch to turn Wi-Fi off and disconnect from the wireless network.

You can also press and hold the network name and then tap delete to disconnect. But this removes the security settings if it’s a secured network, and you’ll need to enter them again next time you reconnect to this Wi-Fi network.

**Using your phone as a mobile hotspot**

Want to share your Internet connection with your laptop or another device? You can turn your phone into a mobile hotspot by sharing your cellular data connection over Wi-Fi. Other Wi-Fi enabled devices can then use your shared data connection to connect to the Internet.

- To share your cellular data connection, this feature must be enabled on your current phone plan. This is also known as tethering and often costs extra.
- When you and other people use the shared connection on another device, it uses data from your cellular data plan. Please be aware of any data limits you have on your plan, so you don’t get charged extra.

1. On the Start screen, tapVED.
2. Tap Settings > Internet Sharing.
3. Tap the Sharing On/Off switch to turn Internet Sharing on.
4. Tap *setup*, and then change these settings:

<table>
<thead>
<tr>
<th>Broadcast name</th>
<th>Enter a name for your mobile hotspot. This is the name that other people will see and use to connect to your shared connection over Wi-Fi.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Security type</td>
<td>Select <strong>password required (WPA2)</strong> to set up your mobile hotspot as a secured network. Or select <strong>none (open)</strong> to grant access to anyone.</td>
</tr>
<tr>
<td>Password</td>
<td>If you chose <strong>password required (WPA2)</strong>, enter a password that’s required to connect to and use your shared connection.</td>
</tr>
</tbody>
</table>

5. Tap ✅ to save your settings.

When you tap the top of the screen to see the status bar, you’ll see the Internet Sharing icon 🌐 while you’re sharing your cellular data connection.
Search and Web browser

Ways you can search the Web

Just press the search button on your phone to search the Web using Bing®.

Besides typing something and searching for it on the Web, you can do much more with Bing:

- Search the Web by voice. To find out more, see Using speech on your phone on page 20.
- Search for info by using the camera to scan QR codes, images such as book covers, and more. See Scanning codes, tags, and text on page 62.
- Use music search to easily find out details about the music you’re listening to. To find out how, see Music search on page 65.
- Look for nearby restaurants, shops, and things to do. See About Local Scout on page 69.

Some web search features may not be available in certain countries.

Searching for information

1. Press . The Bing Search screen opens.
2. Tap the search box, enter what you want to search for, and then tap on the keyboard.
3. Slide left or right across the screen to narrow or broaden the search results to web, local, or images.
Under the web results, you can scroll up or down to see different kinds of results, such as news, related searches, apps, products, flight status, and more. The types of results displayed will depend on what you’ve entered and searched for.

## Scanning codes, tags, and text

Want to scan something? Using Vision search, you can use the camera to scan lots of things you see, and then search for those things on the Web.

You can scan QR Codes and Microsoft Tags that you see in magazines, online, on signs, or anywhere else. You can also scan text to search, have it translated, and paste scanned text into a message.

The items you can scan and search for vary by country or region.

---

### Scanning a QR Code

1. Press 📷.
2. On the Bing Search screen, tap 📷.
3. Point the camera at the QR Code you want to scan.
   
   You’ll then see the Results screen.
4. Tap the result to get info about the QR Code. The information that appears depends on the QR Code and can be a message, contact info, email address, website, or phone number.

### Scanning a Microsoft Tag

1. Press 📷.
2. On the Bing Search screen, tap 📷.
3. Point the camera at the Microsoft Tag you want to scan.
   
   You’ll then see the Results screen.
4. Tap the result to get info about the Tag.

### Searching by scanning a barcode, book, CD, or DVD cover

1. Press 📷.
2. On the Bing Search screen, tap 📷.
3. Point the camera at the barcode, book cover, CD cover, or DVD cover you want to scan.
   
   You’ll then see the Results screen.
4. Tap the result to get info from the Web about the item you’ve just scanned.
Searching by scanning text

You can scan text and then search the Web using the scanned words. Or you can have the text translated.

1. Press 📡.
2. On the Bing Search screen, tap 📡.
3. Point the camera at the text you want to scan, and then tap scan text.
4. You can:

<table>
<thead>
<tr>
<th>Search the Web.</th>
<th>Tap each of the squares that contain the words you want to search for, and then tap search.</th>
</tr>
</thead>
<tbody>
<tr>
<td>See a translation for text that’s recognized.</td>
<td>Tap translate, and then choose a language.</td>
</tr>
</tbody>
</table>
Opening and navigating web pages

Internet Explorer® Mobile makes it quick and easy to surf the Web on the go. By using tabs, you can open multiple web pages and switch between them quite easily.

Opening a web page

1. On the Start screen, tap Internet Explorer.
2. Tap the address bar, and then enter a web address. As you type, Internet Explorer will suggest possible matches.
3. If you see the site you're looking for, tap it. Or tap ➔ on the onscreen keyboard.

Using tabs to open multiple web pages

You can open up to six separate browser windows (called “tabs” in Internet Explorer) simultaneously. Tabs make it easy to hop between sites.

1. In Internet Explorer, tap ➕ > tabs.
2. Tap ➕ to open a new tab. A blank browser screen then opens.
3. On the new browser screen, go to a website that you want.

Switching between tabs

1. In Internet Explorer, tap ➕ > tabs.
2. Tap the thumbnail that shows the website you want to open.

If you no longer need to view a website, you can close the tab by tapping ✗.

Sharing a link

When you see a website that you like, you can easily tell your friends about it by sharing its link. You can send the link in your text or email message. Or post it in your social networks.

1. While viewing the website in Internet Explorer, tap ➕ > share page.
2. Choose how you want to share the link.

If you chose to share the link in your social networks, enter your message, select which networks to post on, and then tap ✉️.
Music search

Songs you hear on the radio, or when you're out and about, don't need to be a mystery anymore. You can search for music that's playing to find out more about it, such as the song title, artist, album, and ways to listen to or buy it.

- Music search can only recognize recorded music. Music from live performances or humming can't be recognized.
- Music search may not be available in some countries or regions.

Searching for recorded music that's playing

1. Press 📱. The Bing Search screen opens.
2. With the music playing, hold your phone where you can clearly hear the music, and then tap 🎤.
   After scanning, the song title, artist, album name, and album art will appear for songs that are recognized.
3. To find the song in Marketplace, tap Marketplace. You can then preview that song and other ones on the album, and also buy if you want to.

Selecting from previous music search results

You can go back and find music that you've searched for in the past.

1. Press 📱.
2. On the Bing Search screen, tap ••• > music history.
3. On the Music history screen, tap a song to find it on Marketplace.
Maps and location

Location services

Turning on location services

You can choose to turn on location services to allow apps to use your location information and provide you with a richer experience. For example, your GPS location can be stored on the photos that you take with the Camera app. And if you’re not sure where you are, Bing Maps can find and display your location.

1. On the Start screen, tap Settings.
2. Tap Settings > location.
3. Tap the Location services On/Off switch to turn it on.

Apps for which you enable location services can now access your current location.

Bing Maps

About Bing Maps

Bing Maps can show you where you are, find the address or place you’re looking for, and give you directions to reach your destination. It can also show you nearby stores or restaurants you might be interested in and what other people are saying about them.

- You need to connect to the Internet to use Bing Maps.
- Certain features of Bing Maps may not be available in some countries or regions.

Moving around the map

1. Drag your finger in any direction to view other areas of the map.
2. To zoom in, spread your thumb and forefinger apart on the map. To zoom out, pinch your fingers together.
3. Double-tap the map to automatically center and zoom in on a spot. Double-tap again to get even closer.
Finding your location

Before you can find your location and see it on the map, you need to turn on location services in the settings first (if you declined when the Maps app asked to access and use your location).

1. On the Start screen, tap 📲.
2. Tap Maps. The app tries to find your location and display it on the map.
3. If the displayed location on the map isn't quite accurate, tap 🔍 to find your location again.

Finding an address or place

1. On the Start screen, tap 📲.
2. Tap Maps.
3. Tap 🌐.
4. In the search box, enter any of the following:
   - An address
   - A zip or postal code
   - A city
   - A business name or type
   - An intersection
   - A point of interest
5. Tap ➡️ on the onscreen keyboard.
6. To get more info about the place, tap the pushpin📍 on the map.

💡 You may see several pushpins on the map if there are several results found.
What are pushpins?

Pushpins are handy for remembering places you want to visit, getting directions, or sharing location info. They’re automatically shown on the map when you search for places. You can also manually add a pushpin.

When you tap a pushpin for a store, restaurant, or other point of interest, the about screen opens and displays additional info, such as the street address, directions, phone number, hours, web address, and customer reviews. You can choose what to do with the location info, such as pin to your Start screen, add to your favorites, or share it.

Adding a pushpin

While viewing your map, press and hold on the spot where you’d like to add a pushpin.

Viewing pushpins as a list

If several pushpins are shown on the map after you’ve done a search, you can display them as a list to see the search results in detail.

While viewing the map, tap ⋮ > search results.

Sharing an address

Need to tell someone where to meet you? Send the address in a text or email message, so the person you’re meeting with can see it on a map or get directions.

1. In Maps, search for the location you want to share.
2. Tap the pushpin of that location.
3. On the about screen, tap 
4. Choose how you want to share the address.
Getting directions

Get detailed directions to your destination. When viewing directions in Maps, you’ll see the total distance and estimated travel time to help you plan ahead.

Certain features such as turn-by-turn voice directions may not be available in some countries or regions.

1. While viewing a map, tap 🌐.
2. Use your current location as the starting point, or enter another location in the **Start** field. And in the **End** field, enter your destination.
   
   In these fields, you can enter:
   
   - an address
   - a restaurant, store, or other business name

   Maps then displays a split screen, showing a map with the planned route on top and the list of directions at the bottom.

3. Tap 🚗 to see driving directions, or tap ⚠️ for walking directions.
   
   When you scroll through the list of directions, the map auto refreshes to show the direction.

4. Maps automatically announces the next turn or direction while you’re approaching it. If you want to listen to the voice instruction before the turn or direction, just tap it in the list. (Or if you’re driving, have one of your passengers do it for you.)

5. When you reach your destination, tap it to display the location information.

   While viewing directions, press ↹ to view the map in full screen so you can see the route and pan on the map. To see the list of directions again, tap ⚙️ > directions list.

Local Scout

About Local Scout

New to the area or just looking for something new to do? Local Scout can help you find nearby restaurants, shops, and things to do. You can get relevant info about the different places to help you decide where to go.

Local Scout may not be available in some countries or regions.
Finding nearby places in your current location

1. On the Start screen, tap **Local Scout**.
   Bing Maps then finds your location and displays nearby places you can go to on the Local Scout screen.
2. Slide left or right across the screen to view the various suggested places that are listed under these categories: **eat + drink**, **see + do**, **shop**, and **highlights**.
3. Tap a place to get more info.
4. While viewing the list of places (such as restaurants under **eat + drink**), tap the map at the top of the screen to see where these places are on the map.

Finding places in another area

You can use Local Scout to find places in any other area and plan your trip ahead of time. For example, if you’re taking a trip to another city, use Bing Maps first to search for the city, and then use Local Scout to find places in that area.

1. On the Start screen, tap 🌐.
2. Tap **Maps**.
3. Tap 📍.
4. In the search box, enter a city name.
5. Tap ➔ on the onscreen keyboard.
6. Tap 🌐.

Changing how Local Scout searches

By default, Local Scout narrows the search by distance from your current location or a location that you specified. If you’re looking for restaurants or stores, you can set Local Scout to search by ranking or category.

1. In Local Scout, tap **distance** below **eat + drink** or **shop**.
2. Tap the I care about box, and then choose a type you’re interested in. For example, you can tap **highest rated** to look for restaurants or stores that other people highly recommend.
3. Press ← to see the new search results.
Calendar

What you can do in Calendar

Never miss an important date again. You can sync your existing calendars from your email accounts to your phone and see them in the Calendar app. You can also add new appointments, create your to-do list, and respond to invitations that people send you.

- After you’ve set up your email accounts such as Windows Live, Outlook (Exchange ActiveSync), and Google, the calendars associated with your accounts will be synced to your phone.

  If you haven’t set up your email accounts, see Email on page 40 to find out how to add them to your phone.

  When you create new appointments on your phone, they will be synced to the calendars in your accounts.

- If you’ve set up a Facebook account, you’ll see your Facebook events in the Calendar app. You can only view and not create or edit Facebook events on your phone.

Creating a calendar appointment

When creating a new appointment, you can choose which account’s calendar to add it to.

1. On the Start screen, tap Calendar.
2. In day or agenda view, tap .
3. If you have more than one calendar, tap the Calendar box, and then select an account in which to add the appointment.
4. Enter the appointment details.
5. At the bottom of the screen, tap more details to set a reminder, appointment’s occurrence, and more.
6. Tap to save.
Quickly creating an appointment on a time slot

If you don’t need too much detail on your appointment, you can quickly create an appointment by just selecting a time slot and typing a subject right on the calendar.

1. In the Calendar app, go to **day** view.
2. Tap a time slot, enter a subject, and then tap ☐.

Later, you can just edit the appointment if you need to add more details or move it to another account’s calendar.

Sending an invitation

You can use Calendar to schedule a meeting or an appointment and invite people to attend it. An invitation email will be sent to them from the account that you choose.

>You can only invite contacts that are stored or synced on your phone.

1. In Calendar, create a new appointment.
2. Tap the **Calendar** field, and then choose the account to use for sending the invitation.
3. Add details, such as date and time, location, and more.
4. Tap **more details**, scroll down the screen, and then tap **add someone**.
5. Invite required and optional attendees. Tap **add someone**, and then tap the name of the person to invite.
6. Tap ☐ when you’re done.

Creating a new to-do task

To-dos show up on your calendar, and they appear alongside your appointments.

>You can only create to-dos in Windows Live and Outlook (Exchange ActiveSync) accounts.

1. In the Calendar app, swipe left or right to go to the **to-do** list.
2. Tap ☐.
3. If you have more than one account, choose the account in which to add your to-do task.
4. Fill in the details for your task, such as subject, due date, and more.
5. To set a reminder, turn **Reminder** on, and then choose a date and time.

6. Tap 📅 to save.

If you’ve set a due date, you’ll see your to-do task in that date’s **agenda** view. You’ll also see your to-do task in the **day** view of your set reminder date and time.

### Displaying and syncing calendars

You can choose which calendars to show or hide in the Calendar app, and which ones to keep synchronized.

#### Showing or hiding calendars

1. In **day** or **agenda** view, tap ⚙️ > **settings**.

2. Tap the on/off switch for each calendar that you want to show or hide.

The calendars are kept synchronized on your phone, whether or not you hide them.

#### Choosing which calendars are synced on your phone

You can choose which calendars to keep synchronized on your phone.

1. On the Start screen, tap 📅.

2. Tap **Settings** > **email + accounts**.

3. Tap the account whose calendar sync setting you want to change.

4. Select or clear the **Calendar** check box, depending on whether you’d like to sync or stop syncing the account’s calendar.

5. Tap ✔ to apply the changes.
AT&T apps

AT&T myWireless

Manage your AT&T account from your phone with AT&T myWireless. Pay your phone bill, see how many voice minutes you have left, view data usage, and more.

From the Start screen, tap > AT&T myWireless.

AT&T U-verse Mobile

With AT&T U-verse Mobile, you can download available shows from the Mobile Library and watch them on your phone. Once a show is downloaded, you can watch it anytime, even when your phone is not connected to any network or is in airplane mode.

On the Start screen, tap AT&T U-verse Mobile.

Three service levels are provided:

<table>
<thead>
<tr>
<th>Service Level</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Guest</td>
<td>Guest users don't need to sign in, and can browse content and view program information. Guest users cannot download content.</td>
</tr>
<tr>
<td>National Subscriber</td>
<td>This is for AT&amp;T Wireless subscribers who do not have U-verse TV service at home, but who pay a monthly fee to receive the Download and Watch experience.</td>
</tr>
<tr>
<td>U-verse Subscriber</td>
<td>This is for AT&amp;T Wireless subscribers who have U-verse Mobile at home. These subscribers get the Download and Watch experience and can manage recorded content from their phone.</td>
</tr>
</tbody>
</table>
**AT&T Navigator**

Use AT&T Navigator to get turn-by-turn driving directions to a destination you enter or a place of interest in the directory.

From the Start screen, tap > AT&T Navigator and start navigating.

**AT&T FamilyMap**

Use AT&T FamilyMap to locate anyone who is on your AT&T account and in the AT&T coverage area. You can find out where your kids are, be notified what time they arrive home, and more. Enjoy peace of mind with AT&T FamilyMap.

From the Start screen, tap > AT&T FamilyMap.

**AT&T Code Scanner**

AT&T Code Scanner reads UPC, QR and Data Matrix barcodes. Scan, Shop, Save.

From the Start screen, tap > AT&T Code Scanner.
More apps

What’s HTC Hub?

HTC Hub is where you can check out weather forecasts, stock updates, and news. It’s also the place to go to find out what free HTC apps you can download from Windows Marketplace.

You’ll find free apps ranging from useful everyday tools to games and fun apps that pass the time. Visit the HTC Hub from time to time to check for new additions and updates.

------------------

Downloading an app in HTC Hub

1. From the Start screen, tap > HTC Hub.
2. Slide left or right until you see the featured apps.
3. If you don’t see any app that you like, tap Get more. On the next screen, slide left or right to check what other apps and games are available for download.
4. Tap an app to view details.
5. While viewing the details, slide left or right to see more information such as reviews, screenshots, and other related apps.
6. Depending on the app you selected (free or paid app), you can download and install it for free, try it out, or buy it.
   You can also share the link and tell your friends about the app.
Checking weather

Should I bring an umbrella today? In HTC Hub, check what the weather’s like before you head out.

1. On the Start screen, tap 

2. Tap HTC Hub.

You’ll see the weather clock showing the weather for your current location. You’ll also see a list of other cities and their weather conditions.

3. Tap the weather clock to open the weather screen where you can see more detailed weather forecasts for your location. Or tap another city to check its weather forecasts.

4. On the weather screen, tap the icons at the bottom to view in full screen, check hourly weather, or check weather forecasts for the upcoming days.

- To refresh the weather info onscreen, tap 
- Not seeing your current location’s weather forecast? Return to the Start screen and go to Settings > location to check whether Location services is turned on.

Adding a city

1. On the weather clock screen in HTC Hub, scroll down the list to check what cities have already been added.

2. To add a new city, tap 

3. Enter the name of a city or country.

As you type, a list of possible locations are shown based on the letters you entered.

4. Tap the city that you want to add.
Changing the order of cities

1. On the weather clock screen in HTC Hub, tap ⌘ > edit.
2. Press and hold ⬅ at the end of the item you want to move.
3. When the selected city is highlighted, drag it to where you want it to appear in the list.
4. Tap done.

Deleting cities

1. On the weather clock screen in HTC Hub, tap ⌘ > edit.
2. Tap each city you want to delete.
3. Tap done to delete them.

Changing the temperature scale and other settings

1. In HTC Hub, tap the weather clock to open the weather screen.
2. Tap ⌘ > settings.
3. Under Temperature scale, select Fahrenheit or Celsius.
4. Turn on or off weather sound effects and other options.
5. Press ⌘ to apply the new settings.

Keeping track of your stocks

Get the latest updates for the stock quotes and market indices that you follow in HTC Hub.

1. On the Start screen, tap 📈.
2. Tap HTC Hub.
3. Flick left to go to the stocks list.
4. If there’s a long list, swipe your finger up or down to browse through the stocks that you’re following.

5. Tap an item to see a stock’s trade information and price chart for the current day.

6. Tap another period if you want to check the stock’s past trade information. For example, tap 5D to check the trade information for the past 5 days.

Want instant updates to just one stock quote or index?

Easy. Just pin the stock quote or index to your Start screen.

1. On the Start screen, tap  

2. Tap HTC Hub.

3. Flick left to go to stocks.

4. Press and hold a stock quote or index that you want to place on your Start screen, and then tap pin to start.

A live tile for your chosen stock quote or index will be added to your Start screen.

---

Adding a stock quote or stock market index

1. While viewing stocks, tap +.

2. Enter a stock quote or market index that you want, and then tap .

   Matched results will be listed.

3. Tap the stock quote or market index you want to add.

---

Changing the stock list order

1. While viewing stocks, tap + > edit.

2. Press and hold at the end of the item you want to move.

3. When the selected item is highlighted, drag it to where you want it to appear in the list.

4. Tap done.
Deleting stock quotes or indices

1. While viewing stocks, tap ☰️ > edit.
2. Tap each stock quote or index you want to delete.
3. Tap done to delete them.

Changing the price rise color and other settings

Downloading stock information automatically may incur extra data fees.

1. While viewing a stock’s trading chart and other details, tap ☰️ > settings.
2. Change the color for displaying stock price increases to either red or green, depending on what’s being used in your country.
3. Choose other options such as the update schedule, and more.
4. Press ← to apply the new settings.

Reading news feeds

Don’t get left behind with yesterday’s stories. In HTC Hub, subscribe to news feeds that cover breaking news, sports, top blogs, and more.

Subscribing to news channels

1. On the Start screen, tap 🔁.
2. Tap HTC Hub.
3. Slide left or right until you see the list of subscribed news channels.
4. To subscribe and add a news channel, tap 📰.
5. You can:
   - Tap a category such as Blogs or Entertainment, and then select one or more channels to subscribe to. After you’ve finished selecting, press ← twice to return to the list of subscribed channels.
   - Or tap 📰 to search for a specific keyword or a feed URL. Select one or more channels to subscribe to, and then tap 📰.
Reading a story

1. Tap a subscribed news channel to see only the stories from that channel, or tap All items to see the stories from all your subscribed channels.

2. Tap a story that you want to read.

3. While reading the synopsis, you can:

<table>
<thead>
<tr>
<th>Tap</th>
<th>To</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="web page" /></td>
<td>Go to the web page where the story is published to read the full article.</td>
</tr>
<tr>
<td><img src="image" alt="share" /></td>
<td>Share the link to the story from the available options.</td>
</tr>
<tr>
<td><img src="image" alt="go" /></td>
<td>Go to the previous or next story.</td>
</tr>
</tbody>
</table>

Want instant updates to a subscribed news channel?

Just pin your favorite news channel to the Start screen.

In the list of subscribed news channels, press and hold your favorite channel, and then tap pin to start.

A live tile for your favorite channel will be added to your Start screen, and it will show the headline of the latest story.

Unsubscribing news channels

- To unsubscribe a single news channel, press and hold that channel, and then tap unsubscribe.
- To unsubscribe several channels, tap ![more options](image) > unsubscribe.

Working with Notes

Note to self – pick up flowers for wife before going to dinner. Use the Notes app to create short reminders to yourself.

If this app is not preinstalled on your phone, open the HTC Hub and download this free app.

Creating a note

1. On the Start screen, tap ![open app](image).
2. Tap Notes.
3. To create a new note, tap  
4. Enter your note and then tap

You can also tap the sticky note image at the lower left of the Notes screen to create a new note.

**Browsing through your notes**

- You can browse your last few notes on the bulletin board.

- Or tap  to see all your notes in list view. Swipe up or down to scroll through your notes.

You can also swipe left or right to switch between the bulletin board and list view.
Moving a note around the bulletin board

1. Press and hold a note until it floats.
2. Drag the note to where you want to put it on the bulletin board, and then release it.

Editing a note

1. On the bulletin board or in list view, tap a note to open it.
2. Tap the note again to edit it.
3. Tap 📝 to save your changes.

Deleting a note

1. On the bulletin board or in list view, tap the note you want to delete.
2. Tap ⌠

Deleting multiple notes

1. Tap ⌠ to go to list view.
2. Tap ⌠
3. Select the notes you want to delete, and then tap done.

What’s in the Office hub?

Microsoft Office Mobile includes mobile versions of Microsoft Office applications. You’ll find them in the Office hub.

1. On the Start screen, tap 📲.
2. Tap Office.
3. Slide left or right across the screen to see your documents and other stuff.

<table>
<thead>
<tr>
<th>notes</th>

Xbox LIVE in the Games hub

Gaming on your phone is a truly social experience. With Xbox LIVE, Microsoft’s gaming service, play games with your friends and use your avatar and gamer profile to keep track of game scores and achievements online through the Games hub.

1. On the Start screen, tap Games.
2. Slide left or right across the screen and check what games are available.

<table>
<thead>
<tr>
<th>collection</th>
<th>View all Xbox LIVE and other games that you have on your phone in one place. Just tap a game to start playing. You can also download more games from Marketplace.</th>
</tr>
</thead>
<tbody>

</tr>
</tbody>
</table>

Xbox LIVE or Marketplace may not be available in some countries or regions.

From the Games hub, you can also connect to and extend your gaming experience to your computer and your Xbox console.
Downloading and installing Xbox LIVE Extras

Customize your avatar on the go with Xbox LIVE Extras. You can download this app for free.

1. On the Games hub, slide left or right to go to Xbox LIVE.
2. Tap your avatar image. Your phone then searches Marketplace for the Xbox LIVE Extras app.
3. Follow the onscreen instructions to download and install the app.

Tap create avatar (or avatar) and start customizing your avatar.
Bluetooth

Connecting a Bluetooth accessory

You can connect a variety of Bluetooth accessories such as headsets, car kits, or speakers to your phone.

- To listen to music, use an accessory such as a Bluetooth stereo headset that supports the A2DP profile.
- Before connecting, make sure to set the accessory to discoverable. To find out how, please refer to the accessory’s manual.

1. On the Start screen, tap 📱.
2. Tap Settings > Bluetooth.
3. Tap the On/Off switch to turn Bluetooth on. Your phone becomes discoverable. It also automatically searches for Bluetooth devices within range.
4. Tap the name of the accessory that you want to pair with your phone.
5. If auto pairing fails, enter the pairing code supplied with the accessory.

When the accessory is connected to your phone, the Bluetooth icon appears on the status bar. You can also check the connection status shown below the accessory name on the Bluetooth Settings screen.

Turn Bluetooth off when not in use to save battery power, or in places where using a wireless device is prohibited, such as on board an aircraft and in hospitals.

Disconnecting a Bluetooth accessory

1. On the Start screen, tap 📱.
2. Tap Settings > Bluetooth.
3. Tap the accessory to disconnect it.

To reconnect, just tap the accessory again.
Unpairing

If you no longer want to use a connected accessory with your phone, you can unpair and remove it from your phone.

1. On the Start screen, tap 🔍.
2. Tap **Settings** > **Bluetooth**.
3. Press and hold the name of the accessory, and then tap **delete**.
Attentive phone features

When your phone rings or during a call, it can sense and automatically respond to your actions or environment. You can go to the settings to find out what smart features your phone has in store for you.

1. On the Start screen, tap 📲.
2. Tap Settings > attentive phone.
3. You’ll find these settings:

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Quiet ring on pickup</td>
<td>Lowers the ring volume automatically when you hold and pick up your phone.</td>
</tr>
<tr>
<td>Pocket Mode</td>
<td>Makes your phone ring louder when it’s in your pocket or bag so you won’t miss calls. When your phone is not in your pocket or bag, it rings at the normal volume you’ve set.</td>
</tr>
<tr>
<td>Flip for speaker</td>
<td>Turns the speaker automatically when you flip your phone over during an ongoing call.</td>
</tr>
<tr>
<td>Flip to mute ringer</td>
<td>Silences the ringer automatically when you flip your phone over.</td>
</tr>
</tbody>
</table>

If there’s any setting you’d like to disable, just clear its check box.

Turning Battery Saver on

When you turn Battery Saver on, your phone automatically turns off some services and features that use battery in the background.

1. On the Start screen, tap 📲.
2. Tap Settings > battery saver.
3. If you want Battery Saver to turn on whenever the battery gets to 20%, select Always turn on Battery Saver when battery is low.
4. If you want to turn on Battery Saver now and leave it on until the next time you recharge the battery, select Turn on Battery Saver now until next charge.
Changing display settings

Adjusting the screen brightness manually

1. On the Start screen, tap  
2. Tap Settings > brightness. 
3. Tap the Automatically adjust On/Off switch to turn it off. 
4. Select the Level of brightness to use.

Setting the time delay before the screen turns off

After a period of inactivity, the screen turns off automatically to save battery power. You can set the idle time before the screen turns off.

1. On the Start screen, tap  
2. Tap Settings > lock + wallpaper. 
3. Tap Screen times out after, and then select the time length that you want.

Changing sound settings

Setting your phone to silent mode

When you keep pressing the VOLUME DOWN button until the volume level reaches zero, this makes your phone vibrate only. To be able to switch your phone to silent mode using the VOLUME DOWN button, you need to turn vibrate off in the settings.

1. On the Start screen, tap  
2. Tap Settings > ringtones + sounds. 
3. Tap the Vibrate On/Off switch to turn vibrate off.

Choosing notification sounds

Choose different sounds for different types of notifications. You can use different sounds for incoming text or chat messages, voicemail, and email notifications.

1. On the Start screen, tap  
2. Tap Settings > ringtones + sounds. 
3. Tap the box for each notification type, and then choose a sound to assign to it. You can also turn on or off notification sounds for reminders and actions such as keypress, camera shutter, and more.
**Enhancing your sound experience**

Get that surround sound feeling when you’re watching videos or listening to music.

Sound enhancements are not available when you’re using a Bluetooth stereo headset.

1. On the Start screen, tap 🔄.
2. Tap **Settings** > **sound enhancer**.
3. Under **Audio** and **Video**, select a sound enhancement you want to use (such as SRS) for music and for video.
4. If you connected a wired headset or an external speaker, you can choose from various preset equalizer settings for enhancing music. As for video, you can choose 5.1 surround sound.
5. Press ← to apply the new settings.

**Changing the language**

The first time you set up your phone, it prompts you to choose a language. You can change the language setting at any time. Changing the language adjusts the keyboard layout, date and time formatting, and more.

Available languages vary by region.

1. On the Start screen, tap 🔄.
2. Tap **Settings** > **region + language**.
3. Tap the **Display language** box, and then choose the language that you want.
4. Tap the underlined text that says to accept changes and restart your phone.

**Managing apps and storage**

**Checking phone info and storage**

You can find out various information about your phone such as the Windows Phone update version, available storage, and more.

1. On the Start screen, tap 🔄.
2. Tap **Settings** > **about**. You’ll see your phone’s name and model as well as the total storage and available storage.
3. Tap more information (or more info) to see the Windows Phone update version and other details.
**Changing application settings**

In most cases, you can change the settings for an app only when you’re inside that app. For some apps, you can change their settings without having to open the apps.

1. On the Start screen, tap 📲.
2. Tap **Settings**.
3. Flick left to go to **applications**.
4. Tap an app or category to see what settings are available and choose the settings that you want.

**Uninstalling an app**

If you’re running out of storage, free up some space by uninstalling apps you no longer need or don’t often use.

Deleting an app removes it from your phone. It also removes any information the app contained. Please remove it with care.

| Most of the preinstalled apps cannot be uninstalled. |

1. On the Start screen, tap 📲.
2. Press and hold an app, and then tap **uninstall**.
Protecting your SIM card with a PIN

Add another layer of security for by assigning a PIN (personal identification number) to your SIM card.

Make sure you have the default SIM PIN provided by AT&T before continuing.

1. On the Start screen, tap 📲.
2. Tap Settings.
3. Flick left to go to applications, and then tap phone.
4. Tap the SIM security On/Off switch to turn it on.
5. Enter the default SIM card PIN, and then tap enter.
6. To change the SIM card PIN, tap Change SIM PIN, and then enter a new PIN.

Restoring a SIM card that has been locked out

If you enter the wrong PIN more times than the maximum number of attempts allowed, your SIM card will become “PUK-locked.”

You need a PUK code to restore access to your SIM card. This code may have been provided by AT&T when you received your SIM card.

1. On the Phone dialer screen, enter the PUK code, and then tap enter.
2. Enter the new PIN you want to use, and then tap enter.
3. Enter the new PIN again, and then tap enter.

Protecting your phone with a password

Protect your personal information and prevent others from using your phone without your permission by setting a password.

You’ll be prompted for your password every time your phone is turned on or when it’s been idle for a certain period of time.

1. On the Start screen, tap 📲.
2. Tap Settings > lock + wallpaper.
3. Tap the **Password On/Off** switch to turn it on.
4. Enter your password in both the **New password** and **Confirm password** boxes.
5. Tap **done**.
How to get and install updates

From time to time, software updates may be available. Your phone can check and notify you if there’s a new update.

Although your phone notifies you “over the air” (through your phone’s Internet connection) when an update is available to download, the actual software update is not carried out over the air. You need to connect your phone to your computer to download and install an update.

Setting the type of connection to use for checking updates

Check if your phone has been set to notify you about new updates. Also choose the type of connection you want to use for checking updates.

1. On the Start screen, tap 
2. Tap Settings > phone update.
3. Make sure the Notify me when new updates are found check box is selected.
4. Choose whether to allow the use of your phone’s data connection to check for updates. If you disable the use of the data connection, your phone will only check for updates over Wi-Fi or when it’s connected to your computer.

Preparing for a software update

To make sure a software update can be carried out smoothly and without interruptions, prepare your phone and computer first for the update. Here are some tips on what you need to check and prepare.

- If your battery level is low, give your phone a quick charge before starting the update.
- Check how much free space you have on your phone and make some room for the update. To find out how to check the available storage, see Checking phone info and storage on page 90.

If necessary, remove a few unwanted apps. Refer to Uninstalling an app on page 91 to see how it’s done.

Or delete large files (such as photos, videos, or music) from your phone.

- Make sure you have Zune installed on your computer. You’ll need it to download the software update. For details, see Installing and setting up the Zune software on page 54.
Free up space on your computer.
You'll need some room to download the software update, to save a backup of your existing phone software and settings, and possibly to sync media files from your phone to your computer.

Make sure your computer has a reliable Internet connection.
In some cases, you might need to switch from a Wi-Fi connection to a wired connection. Or you might need to adjust your computer’s firewall or proxy settings.

Make sure your phone is set with the correct date and time. This determines which new updates you’ll need. For details, see Correcting the date and time on page 95.

Installing an update
When you see the notification about an available software update, you can do the update right away. Or you can dismiss the notification and update some other time. Your phone will remind you again in a few days.

Have you prepared your phone and computer for the update? If you haven’t, please see Preparing for a software update on page 94 on what you should check and prepare.

1. Connect your phone to your computer.
2. Open the Zune software (or Windows Phone 7 Connector for Mac), if it doesn't open automatically.
3. Click Update Now (or Install Updates).
4. Make sure you keep your phone connected to your computer until you see a notification that the update is complete.

Correcting the date and time
If you're having trouble installing a software update, your phone may not have been set with the correct date and time. In most cases, the date and time is set automatically. But if it’s not, you can set it manually.

1. Disconnect your phone from your computer.
2. On the Start screen, tap ☐.
3. Tap Settings > date + time.
4. Turn off Set automatically.
5. Set the correct time zone, date, and time.
6. Reconnect your phone to your computer, and then try installing the update again.
Factory reset

Do a factory reset to change your phone back to its original state before the first time you turned it on.

If you’re passing your phone on to someone else or your phone has a persistent problem that cannot be solved, you can perform a factory reset (also called a hard reset). Factory reset is not a step to be taken lightly. It’ll permanently delete all your data and customized settings, and will remove any apps you’ve downloaded and installed. Be sure to back up any data and files you want to keep before you do a factory reset.

Performing a factory reset via settings

The most convenient way to do a factory reset is via the settings.

1. On the Start screen, tap 📲.
2. Tap Settings > about.
3. Tap reset your phone, and then tap yes.

Performing a factory reset using phone buttons

If you can’t turn your phone on or access settings, you can still perform a factory reset by using the phone’s buttons.

1. Turn the power off.
2. Remove the battery, wait for a few seconds, and then reinsert the battery.
3. Press and hold the VOLUME UP and VOLUME DOWN buttons, and then press and hold the POWER button. Release these buttons when your phone turns on and displays a text screen.
4. Keep pressing the VOLUME DOWN button until the Factory reset option is highlighted, and then press the POWER button.
5. Follow the instructions onscreen to proceed with the factory reset.
